# Click2Compute ONS

April, 2013

What is Click2Compute (C2C)?

Fidelity's Cloud Offering Offers Nearly Real-Time Delivery

Full **automation** of application configuration and customization **removes many steps** currently necessary in business as usual model

Using Click2Compute Infrastructure

Minutes to Complete

Fidelity INVESTMENTS

# . . . While Offering Flexibility and Ease of Use

Flexibility on **how much** to use

when to **stop** using it

Fidelity

Fidelity is Experiencing Rapid Growth

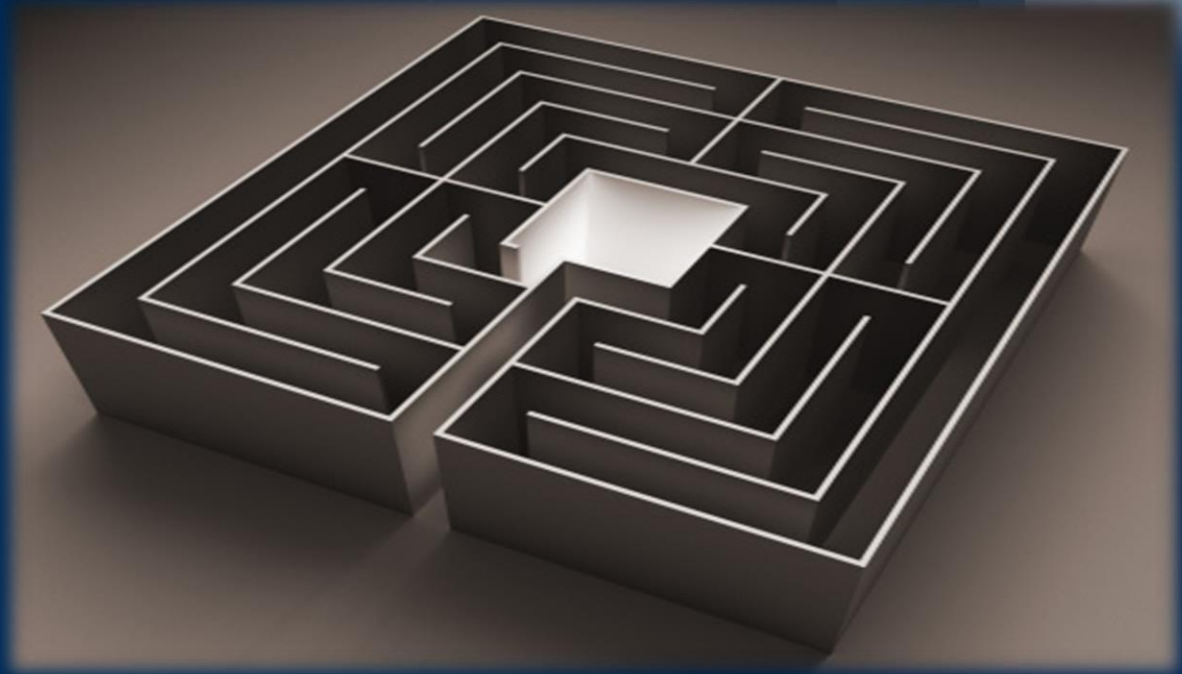

VM Creation/Deletion Trend

Network Automation

- State of Art in Network automation is cut and paste

- Cloud computing will enable service to be turned up in minutes not months

- Scale and Complexity will outpace our ability to source new business requirements

- Application validation is too complex to ensure the higher expectation of the business

Fidelity
INVESTMENTS

Multi-Tenancy

- Legal separation and Mergers & Acquisitions

  - Security more stringent access controls in the Enterprise

- SaaS offerings we use or sell are increasing becoming a part of the business sales process

What we are doing…..

- Merchant silicon companies - low cost commodity switches

- Porting Linux tools onto switches to configure & manage

- Exploit SDN offerings to create stronger automation and multi-tenancy
