IBIS Chair's Report & Roadmap Update

Michael Mirmak

Intel Corp.

DAC 2004

IBIS Summit

June 8, 2004

The Good News...

* More visibility for IBIS 4.1 and ICM
  - *JEITA WG driving interest in Japan (April EDN)*
  - *Increasing demands for 4.1 Golden Parser*
* Futures Committee active and considering seven major improvements to IBIS
  - Includes ICM links, user-defined measurements, 4.1 clarifications
* Cookbook Committee has developed outlines for revised IBIS and new ICM Cookbooks
* IBIS Quality Committee has completed documents and is developing examples
  - Reports Quality features already in use!
* Significant web updates ramping up
  - Indexed Summit presentation archive on-line
  - Redesign of site, including parser & membership information, being prepared

Storms Ahead

* Membership renewals beginning to lag
  - Finances healthy today, but…
  - *Need eight (8) renewals by year's end to ensure financial solvency*

* IBIS 4.1 Golden Parser at risk
  - Development contract being written and commitment to developer pending
  - Parser completion estimated to take less than three (3) months
  - *Insufficient funds today to ensure completion of parser*

* Need more Parser licensees
  - IBIS 4.0 parser purchasers receive free upgrades
  - Development of 4.1 financed entirely through new purchases
 - *At least six (6) new parser licensees required to cover costs*

The IBIS Open Forum needs your support to continue advancing the specification!

Development Timeline

Not Shown
- July, 2002: IBIS 4.0 approved
- Sept., 2003: ICM 1.0 approved

Spec Activities

IBIS 4.1 Approval

ICM 1.0 Cookbook

ICM 1.5 Proposal

IBIS 4.1 Parser
