

Xilinx

support.xilinx.com

Knowledge at your fingertips

support.xilinx.com from Xilinx®

There are websites, and then there are websites.

support.xilinx.com is online support at its finest. From

Forums to Problem Solvers to the Answers Database...

you won't find a more flexible, comprehensive, easy-to-use online resource.

Forums

Your best resource for solving problems or design dilemmas is often other designers. With the support.xilinx.com Forums, you can collaborate with other designers in discussion groups or in our chat rooms. Forums also provide an interface to the popular newsgroup comp.arch.fpga.

Answers Database

Take troubleshooting matters into your own hands. The support.xilinx.com Answers Database has over 4,000 unique problem solutions indexed in logical categories. Get answers the way that works best for you. Use our Answer Browser or our powerful search engine to review database archives, technical tips, application notes, or software manuals.

Problem Solvers

Do you want to find answers to your design questions in a logical manner? The support.xilinx.com Problem Solvers for installation and configuration, PCI and JTAG automatically troubleshoot your configuration or installation problem using a series of diagnostic questions. Problem Solvers is an interactive tool that can save you hours of work.

techXclusives

Get valuable insight and concrete tips directly from the best in the business. Expert Xilinx Application and Design Engineers, along with other industry specialists, keep you informed on the latest techniques to make your designs more effective. techXclusives is not just a one way street. The open forum lets you discuss and share ideas with the author, get input from other designers, or submit your ideas for future columns.

"When compared against the competition in customer surveys, Xilinx (support.xilinx.com) outscored every other PLD vendor's website in content, accessibility and ease of use."

— Gartner Group, Corporate Customer Satisfaction Study, 1999

Software Updates

Software Updates keep your software running at peak performance with the latest downloads and online tools, including the latest speed files and software enhancements. You also get up-to-the-minute information on software releases and features, or for legacy designers, access to software files and utilities in our archived File Download area.

Library

The support.xilinx.com Library has all the technical documentation you could ever want, including software manuals, user guides, technical tips, application notes, design flow charts, and Xcell, our quarterly journal featuring the hottest technology and design techniques.

Design

The Design section of support.xilinx.com is packed with design resources and intellectual property. Choose from application notes illustrating specific design solutions and methodologies, IP updates and predesigned cores, the Xilinx CORE Generator™ for delivering parameterized cores optimized for Xilinx FPGAs, or the Virtex™ Power Estimator, a Web-based form that allows you to estimate Virtex power consumption.

Education Services

It's everything you ever wanted to know about Xilinx Education Services in one location. Read in detail about the instructor-led classes, e-Learning modules, and Xilinx-produced tutorials. With the push of a button you'll see information on course schedules, registration, and tuition. We even offer a University Program to help colleges and universities educate their students in programmable logic.

Services

Submit and maintain your hotline cases online, open a new case with Xilinx technical support, find sales and distributor contact information, generate your Foundation Express™ license, register your Xilinx software, and keep your maintenance contract current. And just in case we haven't thought of everything, there is a place for you to provide feedback on how we can improve the site.

One-Stop Shopping

support.xilinx.com is the ultimate in one-stop shopping. With just a couple of clicks, you can solve design problems, register for classes, update your software, and collaborate with other designers. What could be easier?
