FPGAExpress–Altera Software Installation Instructions

Before You Install

Before you install the FPGA Express version 9.4 software, you must have both the FPGA Express self-extracting executable file (**setup.exe**) and a license file (**license.dat**). You can obtain both the software and license file from the Altera web site (**http://www.altera.com**). You can use the FPGA Express synthesis tool on PCs running Windows 95/98/NT 4.0.

If you have a question or problem that is not answered by the information provided here, please email Altera Applications with a detailed description of your problem at **support@altera.com**.

Installing the Software

To install the software, perform the following steps (you may wish to print out these instructions):

1. Run the self-extracting file **fe_oem_3_4_pc.exe**. Save the installation program to your hard drive.

2. Run the installation program **install.exe**. Follow the on-screen instructions.

3. To complete your installation, you must specify your license file.

Please note that the software installation directory path must not contain spaces.
